

# CDC's IMPACT *in Ethiopia*

(First two quarters of Fiscal Year 2017)

The Centers for Disease Control and Prevention (CDC) office in Ethiopia was established in 2001 and works closely with the Ministry of Health and other partners to maintain strong programs in training, treatment, counseling and testing, and laboratory capacity building.

As of March 30, 2017,

**> 415,623**

men, women and children received life-saving Antiretroviral therapy (ARV) treatment

Of the **2.2 million** people tested, 31,194 identified HIV positive

**454,073**

pregnant women know their HIV status

**7,548** HIV-infected pregnant women identified, **7579** received lifelong antiretroviral therapy

Of the **28,839** families and contacts of index cases who have accessed counseling and testing service, **1009** were identified positives

**2,222** voluntary medical male circumcision procedures were performed

**13** Confidential Sex Worker Clinics for Sexually Transmitted Diseases STIs/HIV have been established by CDC in Ethiopia
